## Introduction

The Input-Output model is a quantitative economic model which represents the interdependencies of various sectors in an economy. Wassily Leontief was awarded a Nobel Memorial Prize in Economic Sciences "for the development of the input-output method and for its application to important economic problems"<sup>2</sup>. A key use of the input-output model is in computing the effects of the change in demand of a sector on other sectors in an economy. The Ministry of Statistics and Programme Implementation (MoSPI) provides Supply and Use Tables (SUTs) for India, and using the latest publication of SUT 2015-16, the Input-Output Transactions Table 2015-16 has been constructed.

The Input-Output transactions table provides details of total outputs of non-fuel ores and minerals including iron ore, manganese ore, bauxite, copper ore, other metallic minerals, lime stone, mica, and other non-metallic minerals. The total output of each of the ores and minerals comprises of cost incurred on inputs used (goods and services), net indirect taxes paid, and incomes earned by factors of production (gross value added). The transaction flows also provide information on the usage of these ores and minerals in the production processes of other sectors of the economy, and, in particular, manufacturing sectors. The values of exports and imports are also available in this table. The information provided in the input-output table can be used to compute backward and forward linkages of the mining sectors as well as income, output and employment multipliers.

## Supply and Use Tables (SUTs)

The Supply and Use framework is a part of the national accounts system which presents the production structure of an economy. MoSPI has been releasing India's Supply and Use Tables annually since 2008-09. Earlier, the tables were known as the Make and Absorption tables, respectively.

The Supply and Use tables show where goods and services are produced and where they are used as intermediate and final consumption. Additionally, key macroeconomic aggregates can also be found in these tables, including the GDP, GVA, and trade (exports and imports) data. The supply use equation for a given product is as follows:

### *Equation 1 Supply Use Equation*

$$\begin{aligned}
 & \text{Output} + \text{Imports} \\
 &= \text{Intermediate consumption} + \text{Final consumption} \\
 &+ \text{Gross Capital formation (including changes in stocks and valuables)} \\
 &+ \text{Exports}
 \end{aligned}$$

Equation 1 is written in basic price levels, which is the sum of factor costs, exclusive of taxes payable, and includes subsidies receivable by the producer. This price level can be converted to producers' prices, which refers to what is receivable by the producer inclusive of product taxes less subsidies. To get to the purchasers' prices, which refers to the amount payable by the purchaser, the producers' prices are added to trade and transport margins realised by middlemen, retailers, and wholesalers. The IOT entries are at factor cost, and the components of net indirect taxes (NIT = taxes - subsidies) and trade and transport margins are shown in separate rows of the table<sup>3</sup>.

Equation 1 can be rewritten in terms of purchasers' price levels, as in Equation 2.

### *Equation 2 Supply Use Equation at Purchasers' Price Level*

$$\begin{aligned}
 & \text{Output} - \text{Intermediate consumption} \\
 &+ \text{Taxes on products} - \text{Subsidies on products} \\
 &= \text{Final consumption (government and private)} \\
 &+ \text{Gross capital formation (fixed, changes in stocks and valuables)} \\
 &+ \text{Exports} - \text{Imports}
 \end{aligned}$$

Both the Supply and Use tables are Product X Industry matrices. There are 66 columns and 140 rows in the tables representing various industries and intermediate consumption.

In the Supply table, the figures in column  $j$  represent the value produced by industry  $j$  of the product produced by an industry shown in a row  $i$ . These are at basic prices, and by adding NITs and the trade and transport margin, the purchasers' prices can be found. The final column in the Supply Table shows the import of goods and services. In the Use Table, the figures in column  $j$  represent the value used by industry  $j$  of the product produced by an industry shown in a row  $i$ . Beyond the intermediate consumption, final consumption, gross capital formation, and exports are also shown. These are at purchaser prices.

## Format of the Supply and Use Tables

*Table 1 Framework of the Supply Table*

	Industry 1	...	Industry n	Imports	NIT (tax less subsidy)	Trade and transport margin	Total supply at purchasers' price
Product 1	Domestic Output Matrix at basic prices				Valuation matrix		
...							
Product m							
Output / Total at basic price							

*Table 2 Framework of the Use Table*

	Industry 1	...	Industry n	Final consumption	Gross capital formation	Exports	Total use at purchasers' price
Product 1	Intermediate use matrix at purchaser prices			Final use matrix			
...							
Product m							
Total intermediate inputs							
GVA	Value added						
Employee payment							
Gross operating surplus							
CFC							
Tax less subsidies on production							
Total Input / Output							

## Input-Output Table

The input-output (I-O) framework is an economic model which represents the linkages between the outputs of different sectors of an economy. The input-output transactions table shows the values of inter-industry transactions in basic prices, in the form of a *commodity x commodity* ( $C \times C$ ) matrix. The I-O Table may also be constructed as an *industry x industry* ( $I \times I$ ) matrix<sup>4</sup>, where the demand is for a mixed range of outputs of an industry, rather than a particular commodity as in the *commodity x commodity* matrix.

In the *commodity x commodity* I-O Table, the columns represent the commodity, and the rows represent the main commodity produced by the corresponding commodity in the column.

The values of a row show where the total output of a commodity goes through either intermediate or final consumption. The values of a column show what goods and services are used as inputs for the industry. At the bottom of the column, the total inputs, NIT on inputs, GVA, and total output is given.

Beyond the intermediate consumption columns, additional columns are given to account for final consumption (household and government), net exports, and capital formation.

The balanced I-O Table will have the column total for a commodity (which includes the NIT and GVA) equal to the same commodity's row total (which includes intermediate and final consumption).

*Table 3 Simplified Input-Output Framework*

		Industry 1	...	Industry n	Final Use	Total Output
Supply	Industry 1	Intermediate Use				
	...					
	Industry n					
	NIT					
	Value Added					
	Output					

MoSPI has been producing I-O Tables for India from 1968-69, consistent with National Account Statistics. The latest I-O Table released by MoSPI was in 2007-08, which was a 130-sector table. No new I-O Tables are expected to be reported by MoSPI. However, the Supply and Use tables can be used to prepare input-output transactions tables. The Input-Output table for 2013-14 was prepared using that year's Supply and Use Tables (Singh and Saluja, 2016)<sup>5</sup>. It has already been published in NCAER Journal Margin<sup>6</sup>.

## Uses of the Input-Output Table

Some of the main uses of the Input-Output Table include:

- Economic assessment in the case of a change in the final demand of a commodity. The I-O Table can be used to predict what the investment and production requirements will be to meet an increase in the demand for a commodity.
- Impact of changes in the output of the economy on individual sectors and the economy as a whole.
- Preparing satellite accounts.
- Forecasting models and computable general equilibrium (CGE) models make use of the I-O tables.
- Preparing state-level I-O Tables

## Methodology of Constructing the I-O Table

### Purchaser and Basic Price Levels

It is needed to find both the trade and transport and NIT components of the purchasers' price values in the Use table. This was done using the Supply table, where the NIT and trade and transport margins for each industry is given. By dividing the NIT of a commodity by the output at producer price, and multiplying these ratios by values in the Use table (which is in purchasers' prices) for each sector, the NIT component can be found. Likewise, the trade and transport margins for each industry was divided by the output at purchaser price, to find the trade and transport margin component for each sector.

*Table 4 Supply Table - NIT and Trade and Transport Margins*

	Supply at BP	Product Taxes	Output at Producer Price	Trade and Transport Margins	Output at Purchaser Price
Industry 1					
...					
Industry n					

The division of the trade and transport margins and the NIT for each sector was done by making use of the structure of the I-O Table 2007-08.

### 131-Sector Structure

The Input-Output Table for 2015-16 was constructed using the Supply Use Tables of the same year. However, due to the Supply Use Tables having 140 sectors, compared to the 130-sectors in the 2007-08 I-O Table, certain sectors had to be split and collapsed to arrive to the 130-sector structure. For the 2015-16 I-O Table, an additional sector, *Manufacture of Grain Mill Products*, was included, due to its importance to the economy. Thus, the 2015-16 I-O Table is of a 131-sector structure. The mapping between the Supply Use Table sectors and the I-O Sectors can be found in Appendix 1. The mapping between the two structures was done by making use of the sector specifications from the I-O Table document<sup>7</sup>

<sup>7</sup> [2] Appendix 5, Page 54-63

Collapsing the sectors involved summing the values of the sectors in the Supply Use structure to the I-O structure. To split a sector, the structure of the 2007-07 I-O table was used as an approximation, along with data from other relevant sources to check the reasonableness of this approximation.

### Assumptions Made

When converting the Supply and Use tables to a symmetric I-O Table, there are two technology assumptions that can be made:

- The commodity (or product) technology is an assumption that ‘a product has the same input structure in whichever industry it is produced’<sup>8</sup>.
- The industry (or producer) technology is an assumption that ‘all products by an industry are produced with the same input structure’<sup>9</sup> – the 2015-16 I-O table was constructed using the industry technology assumption.

### Method

The Supply Use Tables 2015-16 were used to create a *commodity x commodity* Input-Output table for the same year. In a *commodity x commodity* table, both the rows and columns represent the commodity sector. Using the *commodity x commodity* table was more suitable for this application, since the demand is for a particular commodity, and not for a mixed range of outputs of an industry. Thus, it is not needed to transform the final demand vectors from one unit to another. Using the *commodity x commodity* under the commodity technology assumption could sometimes lead to negative entries in the I-O table, but this issue is not found when using the industry technology assumption (as was done in this case).

The data in an I-O table satisfy the following mathematical relations:

*Equation 3 Input Relations, I-O Table*

$$q_j = \sum_k x_{jk} + f_j$$

*Equation 4 Output relations, I-O Table*

$$q_j = \sum_i m_{ij} g_i = \sum_j m_{ij}$$

Where:

$q_j$  = total output of the  $j^{\text{th}}$  commodity group

$g_i$  = total output of all products and by-products of the  $i^{\text{th}}$  industry group

$f_j$  = final demand of the  $j^{\text{th}}$  commodity group

$x_{jk}$  = output of the  $j^{\text{th}}$  commodity group used as input in the  $k^{\text{th}}$  industry sector

$m_{ij}$  = output of the  $j^{\text{th}}$  commodity group produced by the  $i^{\text{th}}$  industry group

---

<sup>8</sup> <https://stats.oecd.org/glossary/detail.asp?ID=2153>

<sup>9</sup> <https://stats.oecd.org/glossary/detail.asp?ID=1345>

The above variables can be shown in a schematic of the I-O table as seen below.

*Table 5 Input-Output Table Schematic*

	Commodities	Industries	Final demand	Total
Commodities		X	f	q
Industries	M			g
Final demand				
Total				

Using the above vectors, new matrices can be created. The matrices used when creating the Input-Output Table 2015-16 were as follows:

B-matrix: commodity x industry coefficient matrix; values in the use table expressed as coefficients

*Equation 5 B-Matrix*

$$B = Xg^{-1}$$

D-matrix: the market share matrix; columns of which show proportions in which various industries produce the total output of a particular commodity

*Equation 6 D-Matrix*

$$D = Mq^{-1}$$

To create the commodity x commodity table, under the industry technology assumption:

*Equation 6 Commodity x Commodity Table Equation*

$$q = BDq + f$$

## Limitations with the Methodology

The Supply and Use tables seem to have some errors which translates into not reasonable values in the Input-Output table. A few examples of such issues are given below.

- The value of output of *Fertilisers* according to the 2012/13 Supply table is ₹84,130 crores. The same value for 2015/16 supply table is only ₹11,250 crores. According to ASI 2015/16, the value is approximately ₹1,10,000 crores.
- The use of *Fertilisers* into *Construction* is ₹81,564 crores in 2012/13, while the same according to 2015/16 is ₹7,302 crores.
- In 2012/13, there is no input of *Fertilisers* to the *Manufacture of Other Chemicals* (which includes *Fertilisers*). In 2007/08 IOT, the self-input of *Fertilisers* is ₹20,366 crores.
- In 2007/08, *Fertilisers* into *Petroleum Products* is ₹5115 crores, while in 2015/16 *Fertilisers* into the *Manufacture of Coke and Refined Petroleum* products is ₹0
- The use of *Renting of Machinery* in *Coal and Lignite* is ₹4 crores in 2007/08. It is ₹4258 in 2012/13, and ₹37 crores in 2015/16.
- In 2012/13, *Pesticides* to *Construction* was ₹13,288, ₹316 crore to *Storage* and ₹10,256 crore to *Trade*. The corresponding values in I-O 2007/08 are ₹93 crores, ₹60 crores, and ₹31 crores. In the 2015/16 Use table, the use of *Pesticides* is ₹15,089 crores in *Construction*, ₹542 crores in *Storage*, and ₹14,817 crores in *Trade* in 2015/16. The issue is likely from I-O 2007/08.
- The use of *Iron and Steel Foundries* in *Crude Petroleum* is ₹0 in 2007/08, ₹21,000 crores in 2012/13, and ₹8,428 crores in 2015/16
- The use of *Iron and Steel Foundries* in *Construction* is ₹35,962 crores in 2007/08 and ₹2,49,780 crores in 2015/16
- The use of *Other Chemicals* by *Crude Petroleum*: ₹875 crores in 2007/08, ₹19,369 in 2012/13, and ₹26,000 in 2015/16

## Appendices

### Appendix A – Supply Use Table to Input-Output Table: Commodities

<b>Supply and Use Tables (2015-16)</b>		<b>Input Output Table (2007-08)</b>	
1	Paddy	1	Paddy
2	Wheat	2	Wheat
3	Coarse cereals	3	Jowar
		4	Bajra
		5	Maize
4	Gram	6	Gram
5	Arhar		
6	Other pulses	7	Pulses
7	Groundnut	9	Groundnut
8	Rapeseed and mustard		
9	Other oil seeds	11	Other oilseeds
10	Kapas	13	Cotton
11	Jute, hemp and mesta	12	Jute
12	Sugarcane	8	Sugarcane
13	Coconut	10	Coconut
14	Tobacco	17	Tobacco
15	Tea	14	Tea
16	Coffee	15	Coffee
17	Rubber	16	Rubber
18	Fruits	18	Fruits
19	Vegetables	19	Vegetables
20	Other food crops	20	Other crops
21	Milk	21	Milk and milk products
23	Egg and poultry	23	Poultry & Eggs
22	Wool		
24	Other livestock products	24	Other liv.st. products
25	Industry Wood	25	Forestry and logging
26	Firewood		
27	Other forestry products		
28	Inland Fish	26	Fishing
29	Marine Fish		
	Animal services (new)	22	Animal services(agricultural)
30	Coal and Lignite	27	Coal and lignite
31	Natural Gas	28	Natural gas
32	Crude petroleum	29	Crude petroleum
33	Iron ore	30	Iron ore
34	Manganese ore	31	Manganese ore
35	Bauxite	32	Bauxite
36	Copper ore	33	Copper ore
37	Other Metallic minerals	34	Other metallic minerals
38	Limestone	35	Lime stone
39	Mica	36	Mica
40	Other non-metallic minerals	37	Other non-metallic minerals

41	Processed poultry meat & poultry meat products		
42	Processed other meat & meat products		
43	Processed fish & fish products		
44	Processed fruits & Processed Vegetables		
45	Dairy products		
49	Bread & Bakery products		
50	Miscellaneous food products	43	Miscellaneous food products
46	Edible Oils and Fats	40	Hydrogenated oil (vanaspati)
		41	Edible oils other than vanaspati
47	Grain Mill products, starch and starch products		
48	Sugar	38	Sugar
		39	Khandsari, boora
51	Alcoholic beverages	44	Beverages
52	Non-alcoholic beverages		
53	Tea processed	42	Tea and coffee processing
54	Coffee processed		
55	Tobacco Products	45	Tobacco products
56	Cotton Yarn and Cotton Textiles	46	Khadi, cotton textiles(handlooms)
		47	Cotton textiles
57	Synthetic yarn and synthetic textiles	50	Art silk, synthetic fibre textiles
58	Wool yarn and woollen textiles	48	Woollen textiles
59	Silk yarn and silk textiles	49	Silk textiles
60	Carpet weaving	52	Carpet weaving
61	Readymade garments	53	Readymade garments
62	Misc. textile products	51	Jute, hemp, mesta textiles
		54	Miscellaneous textile products
63	Leather footwear	59	Leather footwear
	Leather and leather products except		
64	footwear	60	Leather and leather products
	Wood and wood products except		
65	furniture	56	Wood and wood products
66	Paper, Paper products and newsprint	57	Paper, paper prods. & newsprint
67	Publishing, printing and allied activities	58	Printing and publishing
68	Furniture & Fixtures	55	Furniture and fixtures-wooden
69	Rubber products	61	Rubber products
70	Plastic products	62	Plastic products
71	Petroleum products	63	Petroleum products
115	Gas		
72	Coal tar products	64	Coal tar products
73	Inorganic chemicals	65	Inorganic heavy chemicals
74	Organic chemicals	66	Organic heavy chemicals
75	Fertilizers	67	Fertilizers
76	Pesticides	68	Pesticides
77	Paints, varnishes and lacquers	69	Paints, varnishes and lacquers
78	Drugs and medicine	70	Drugs and medicines
79	Soaps, cosmetics and glycerin	71	Soaps, cosmetics & glycerin
80	Synthetic fibres, resin	72	Synthetic fibres, resin

81	Other chemicals and chemical products	73	Other chemicals
82	Cement	75	Cement
83	Non-metallic mineral products	74	Structural clay products
		76	Other non-metallic mineral prods.
84	Iron and steel Ferro alloys	77	Iron, steel and ferro alloys
85	Iron and steel casting and forging	78	Iron and steel casting & forging
86	Iron and steel foundries	79	Iron and steel foundries
87	Non-ferrous basic metals (including alloys)	80	Non-ferrous basic metals
88	Hand tools, hardware	81	Hand tools, hardware
89	Miscellaneous metal products	82	Miscellaneous metal products
90	Tractors and other agricultural implements	83	Tractors and agri. implements
91	Industrial machinery for food and textile industry	84	Industrial machinery(F & T)
92	Industrial machinery (except food and textile)	85	Industrial machinery(others)
93	Machine tools	86	Machine tools
94	Other non-electrical machinery	87	Other non-electrical machinery
95	Electrical industrial machinery	88	Electrical industrial Machinery
96	Electrical cables, wires	89	Electrical wires & cables
97	Batteries	90	Batteries
98	Electrical appliances	91	Electrical appliances
99	Communication equipment	92	Communication equipments

## Appendix B – Supply Use Table to Input-Output Table: Industries

Input Output Table (2007-08)	Supply and Use Tables (2015-16)	
Paddy Wheat Jowar Bajra Maize Gram Pulses Sugarcane Groundnut Coconut Other oilseeds Jute Cotton Tea Coffee Rubber Tobacco Fruits Vegetables Other crops	Agriculture	
Milk and milk products Poultry & Eggs Other liv.st. produ.	Livestock	
Animal services(agricultural)	NEW	
Forestry and logging	Forestry and Logging	
Fishing	Fishing & Aquaculture	

Coal and lignite	Coal & Lignite		
Natural gas	Natural Gas		
Crude petroleum	Crude Petroleum		
Iron ore	Iron Ore		
Manganese ore	Non-ferrous metal ores		
Bauxite			
Copper ore			
Other metallic minerals			
Lime stone	Other Mining		
Mica			
Other non metallic minerals			
Sugar	Manufacture of other food products	Manufacture of dairy products	Production, processing and preservation of meat, fish, fruit, vegetables, oils and fats
Khandsari, boora			
Hydrogenated oil(vanaspati)			
Edible oils other than vanaspati			
Tea and coffee processing			
Miscellaneous food products			
Beverages	Manufacture of beverages		
Tobacco products	Manufacture of tobacco products		
Khadi, cotton textiles(handlooms)	Manufacture of textiles + cotton ginning		
Cotton textiles			
Woolen textiles			
Silk textiles			
Art silk, synthetic fiber textiles			

Jute, hemp, mesta textiles		
Carpet weaving		
Miscellaneous textile products		
Readymade garments	Manufacture of wearing apparel, except custom tailoring	
Furniture and fixtures-wooden	Manufacture of furniture	
Wood and wood products	Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting material	
Paper, paper prods. & newsprint	Manufacture of paper and paper products	
Printing and publishing	Printing and reproduction of recorded media except publishing	
Leather footwear	Manufacture of leather and related products	
Leather and leather products		
Rubber products	Manufacture of rubber & plastic products	
Plastic products		
Petroleum products	Manufacture of coke and refined petroleum products	Gas
Coal tar products		
Inorganic heavy chemicals	Manufacture of chemical and chemical products except pharmaceuticals, medicinal and botanical products	
Organic heavy chemicals		
Fertilizers		
Pesticides		
Paints, varnishes and lacquers		

Soaps, cosmetics & glycerin		
Synthetic fibers, resin		
Other chemicals		
Drugs and medicines	Manufacture of pharmaceutical; medicinal chemicals and botanical products	
Structural clay products		
Cement	Manufacture of other non-metallic mineral products	
Other non-metallic mineral prods.		
Iron, steel and ferro alloys		
Iron and steel casting & forging	Manufacture of Basic Iron and Steel + Casting of iron and steel	
Iron and steel foundries		
Non-ferrous basic metals	Manufacture of basic precious and non-ferrous metals + Casting of non-ferrous metals	
Hand tools, hardware	Manufacture of fabricated metal products, except machinery and equipments	
Miscellaneous metal products		
Tractors and agri. implements		
Industrial machinery(F & T)	Manufacture of machinery and equipments n.e.c.	Repair and installation of machinery and equipments
Industrial machinery(others)		
Machine tools		
Other non-electrical machinery		
Electrical industrial Machinery	Manufacture of Electrical equipments	

Electrical wires & cables			
Batteries			
Other electrical Machinery			
Electrical appliances		Manufacture of	
Electronic equipments(incl.TV)	Manufacture of computer and peripheral equipment	electronic component, consumer electronics, magnetic and optical media	Manufacture of optical and electronics products n.e.c.
Watches and clocks			
Communication equipments	Manufacture of communication equipments		
Ships and boats			
Rail equipments			
Motor vehicles			
Motor cycles and scooters	Manufacture of Transport		
Bicycles, cycle-rickshaw			
Other transport equipments			
Aircraft & spacecraft			
Medical, precision&optical instru.s			
Jems & jewelry	Other Manufacturing		
Miscellaneous manufacturing			
Construction	Construction		
Electricity	Electricity		
Water supply	Water supply		
Railway transport services	Railway Transport		
Land tpt including via pipeline	Land Transport		
Water transport	Water Transport		

Air transport	Air Transport
Supporting and aux. tpt activities	Supportive & Auxiliary transport activities
Storage and warehousing	Storage & warehousing
Communication	Communication
Trade	Trade
Hotels and restaurants	Hotels & Restaurant
Banking	Financial Services
Insurance	Insurance Services
Ownership of dwellings	Ownership of dwellings
Education and research	Education & Research
